We Build Products for Humans & Bots

BROCHURE - 2018

- Augmented Reality Apps
- Native Android Apps
- Native iOS Apps
- React Native Apps
- Android Instant Apps
- IoT Solutions
- Global CDN Setup
- Machine Learning
- E-Commerce Solutions
- Support Chat
- Social Networking App
- GPS Tracking Solutions
- Chatbot Development
- Delivery App

Machine Learning

We work on Supervised Learning, Reinforcement Learning and specialized in using TensorFlow.

E-Commerce

Jump into to the rapidly growing industry and compete with top players globally with our robust E-Com platform.

Artificial Intelligence

Advanced AI tools for your business to improve growth/sales automation and easy management.

Augmented Reality

Bring AR Exoperience in your app to achieve Next generation marketing approach for your business.
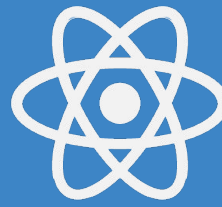

Native Android Apps

Achieve best in class performance & bring new platform features faster with native app development.

Native iOS Apps

We provide top notch native iOS App development for iPhones and iPads with 100% Swift .

React Native Apps
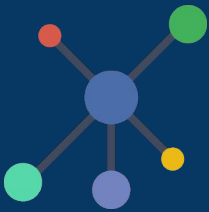

With a single code base get native performance in iOS & Android & also reduces development time by 50%.
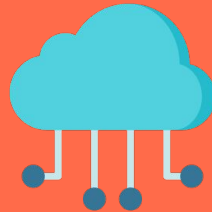

Android Instant Apps

INSTANT APPS

Instant Apps enables your customers to use your app without even installing it from Play Store.

IoT Solutions

We play with all SoCs, Sensors, Gateways, Cloud Servers. We also develop IoT Apps for your requirement.

Global CDN Setup

Improve performance of your website / app by moving the static files to cdn. We offer cdn on over 99+ countries.

Chatbot Development

We can help you build bots across platforms. ChatBots can interact and place orders with users.

Delivery App

Start an app based delivery solution such as food delivery with our on demand delivery platform.

Augmented Reality Solutions we provide

1. Virtual Wearing
2. Product Reality App Development
3. Live Interaction & Speech Control
4. Location/Geo-Based Augmented Reality
5. Advanced Surface Detection Algorithms
6. Moving Objects Tracking
7. Position & Orientation Detection
8. Feature Detection
9. Shared AR Experience & Cloud Anchors
10. Web AR

AR Technologies we work on

1. Android AR Core
2. iOS AR Kit
3. ML Kit
4. Vuforia
5. Unity
6. Argon.JS

AR Solutions for Industries

1. Interior Design
2. Automobile Industry
3. Education
4. Restaurant
